high drainage

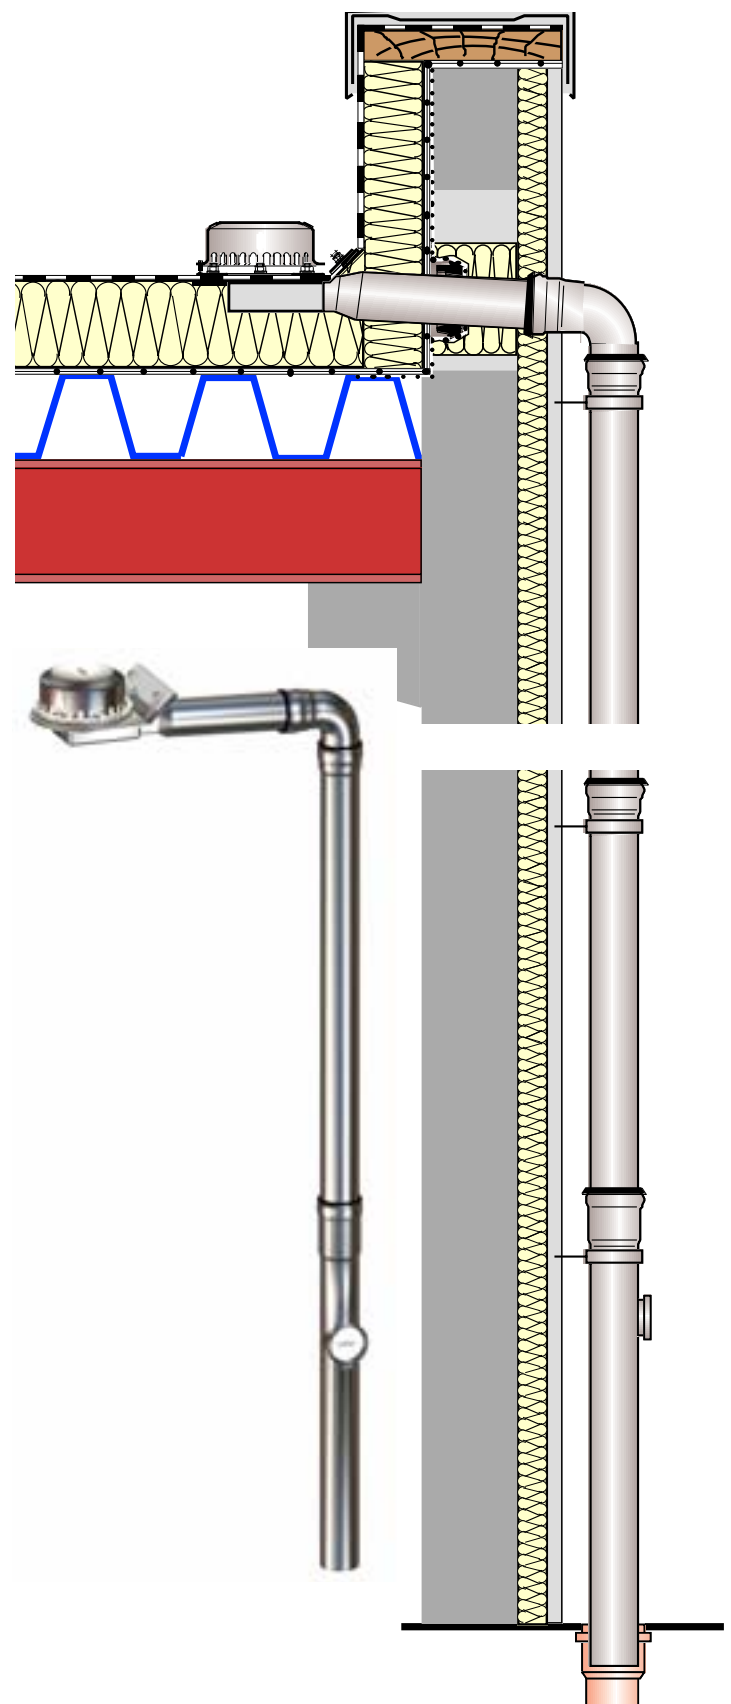

LORO-RAINSTAR<sup>®</sup> scupper roof drainage systems are an upgrade of LORO-DRAINJET<sup>®</sup> scupper drains. The discharge capacity of the new drains has been considerably enhanced by optimizing their fluid dynamics.

The newly-patented drains are built from hot-dip galvanized steel, are additionally coated on the inside and feature a screen basket made of stainless steel. They conform to DIN EN 1253.

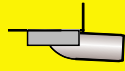

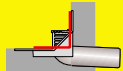

LORO-RAINSTAR<sup>®</sup> scupper roofdrainage systems are supplied as complex systems together with LORO down pipes and pipe fittings.

**Advantages**

- Silent siphonic draiange
- RAINSTAR, 14,0 l/s, DN 100

Form charateristic

... optimal drainage with maximum safety!
