

# LORO Drainage Systems for Balconies and Terraces

Our versatile range of Drains provides a solution to almost all types of drainage problems experienced on balcony and terraced areas. Standard balcony drains are manufactured in hot-dip galvanised steel with additional coating and are available in sizes DN 50 - DN 100. LORO balcony drains can also be supplied in copper to suit special requirements. Balcony drains come with connecting collar or clamp-down flange, with or without thermal insulation.
