

**LORO-X roof drainage systems  
from the drain to the sewer system:**

## **LORO-X Siphonic Scupper roof drainage systems**

**LORO-DRAINJET®**  
siphonic scupper  
drainage systems

**LX 637**

**No roof  
penetration**

- DN 50 and DN 70
- as main or emergency drainage system
- with clamping or adhesive bonding flange
- drainage capacity of up to 16.0 l/sec

**LORO-Attikastar®**  
siphonic scupper  
systems

**LX 766**

**high discharge  
performance**

- DN 70/70/100
- as main or emergency drainage system
- with clamping flange
- drainage capacity of up to 32.0 l/sec

**LORO-X  
combined-Main &  
Emergency**  
scupper roof drainage  
systems

**LX 772**

**Combining  
main & emergency  
drainage in one system**

- integrated emergency drainage
- **main drainage system**, DN 100 drainage capacity: 4.5 l/sec
- **emergency drainage**, DN 50 drainage capacity: 8.2 l/sec

**...optimal drainage  
with maximum safety!**

# LORO®

**LORO-X roof drainage systems  
from the drain to the sewer system:**

## **LORO-X Siphonic Scupper roof drainage systems**

**LORO-RAINSTAR®  
scupper roof drainage systems**

**LORO-X  
scupper direct drainage systems**

**LX 479**

**LX 694**

**with flange for  
upward lip**

**silent-  
gravity-drainage**

- DN 50, DN 70 und DN 100
- as main or emergency drainage system
- for gravity or siphonic drainage
- with clamping or adhesive bonding flange
- drainage capacity of up to 21.7 l/sec

- DN 100
- silent-gravity drainage
- with adhesive bonding flange
- drainage capacity of up to 4.5 l/sec
