

LORO-XCL Stainless Steel Discharge Pipes

LORO-XCL stainless steel discharge pipes DN 50-150, with DIN EN 1124-1 and EN 1124-3, with reliable LORO-X socket joint and different sealing elements for various requirements. Manufactured from antirust stainless steel in the standard material number 1.4301 (AISI 304) and also 1.4404 (AISI 316L) for greater stress.

Range of application:

For pipelines with wastewater and for high chemical and thermal loads in industry, trade, large kitchens and research centres.
