Complete Drainage Systems
for the renovation of
balconies and walkways

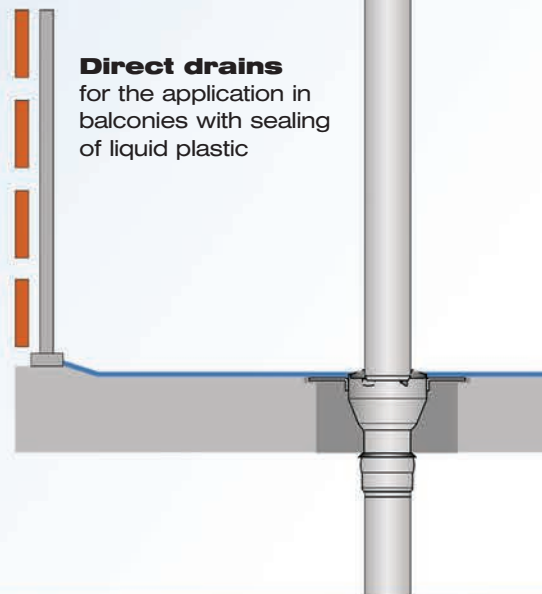

Series HF

Direct drains
for the application in
balconies with sealing
of compound material

Series GF

Direct drains
for the application in
balconies with sealing
of liquid plastic

Different balcony structures and the usage of new materials, such as liquid plastic or plastic/cement combinations, require balcony drain systems that are adjusted to the application, especially in the case of renovations. For the drainage of balconies, LORO has developed special drains for almost every application. These drains provide a secure and long-lasting drainage in combination with the LORO-X rain downpipes.
